

**Global Stewardship Senior Regulatory Associate, Cleaning
GL 26**

**Global Stewardship, R&D
Pleasanton, CA (CPC)**

The position can be based at Clorox offices, Brampton, Ontario.

Position Summary

The Global Stewardship Senior Regulatory Associate is responsible for overseeing US pre- and post-market product registration activities for assigned Cleaning portfolio brands. The Senior Associate understands and translates regulatory and business requirements to optimize timely submission approvals, establishes and executes regulatory strategy, and manages registration and product compliance. This role builds strong partnerships and drives proactive cross-functional engagement to ensure safety, environmental, and regulatory compliance needs are met for projects, products, and portfolio.

Responsibilities

- Serve as the central contact internally and externally to Global Stewardship for assigned projects and brands, ensuring product regulatory compliance from concept through the lifecycle of a finished product.
- Identify innovative solutions to meet compliance requirements and business objectives in partnership with external consultants and internal technical subject matter experts.
- Develop regulatory strategies, effectively manage timelines, and oversee submissions for new or changes to existing product registrations.
- Participate in label development and reviews and provide product claims guidance to stakeholders.
- Translate regulatory information with appropriate technical depth for the given audience and provide balanced regulatory risk assessment.
- Identify, communicate, and develop recommendations to mitigate regulatory project or product risk with contingency planning, including corrective or preventive action.
- Monitor, assess potential impact, and develop appropriate action plans for new or emerging regulations, initiatives, and regulatory changes.
- Coordinate review and approval of voluntary certifications where applicable.
- Develop and maintain best practices, guidelines, procedures, tools and/or trainings to standardize process, drive continuous improvement, and educate others on regulatory compliance requirements.
- Serve as liaison between the Company and regulatory consultants with opportunity to engage regulatory agencies on technical matters, as directed.
- Participate in external engagement activities through industry trade associations, work groups or other relevant initiatives, as assigned.

Years and Type of Experience

- Minimum 5 years of relevant regulatory compliance experience with consumer products, pesticides, pharmaceuticals or other regulated products.
- Experience representing regulatory compliance in cross-functional team setting and project management experience are desirable

Skills and Capabilities

- Ability to work independently and collaboratively in a fast-paced, cross-functional team environment.
- Working knowledge of laws, regulation, and relevant compliance programs under EPA, FDA, CPSC or other, as appropriate, to ensure compliance throughout the product lifecycle.
- Ability to understand and interpret regulatory and technical documents.
- Strategic thinking and influential leadership skills to drive innovative regulatory solutions and enable business objectives.
- Demonstrated ability to effectively manage multiple priorities; results-oriented; process-driven; resilient
- Ability to drive functional excellence to foster innovation, optimizes time to market, and minimizes product and portfolio risk.
- Strong oral and written communication skills with ability to engage and influence various audiences at multiple levels in the organization.
- Excellent planning, organizational, and time management skills with attention to detail.
- Some travel may be required (approximately 5%).

Education level and degree

- Bachelor's degree, or equivalent, in relevant scientific discipline or related field.
